SKILLS

Programming Languages: JavaScript, ReactJS

Tools: Bootstrap, Sketch, Figma

Database: MySQL, MongoDB

Soft Skills: People Leadership, Budgeting, Long Term Planning, Training and Mentoring

PROJECTS

E-Commerce Website

LR Platinum Tires

Developed a dynamic e-commerce platform for LR Platinum, a premium shop catering to superbikes, spare parts, helmets, and tires. The website combines a sleek and responsive UI with robust functionality, leveraging technologies like ReactJS, CSS, and Bootstrap for the frontend. On the backend, we utilized ExpressJS and NodeJS, with MongoDB as the database solution, ensuring seamless performance and scalability.

Tire Shop Ui/Ux Design

LR Platinum Tire Shop

Designed an intuitive and user-friendly web application for LR Platinum Tires, a shop specializing in high-quality tires and spare parts. The web app features a clean and modern layout with responsive design, ensuring seamless usability across devices. Advanced search and filtering options allow users to easily find and compare products, while an efficient checkout process streamlines purchases. The interface is tailored to provide an engaging and professional user experience, aligning with the brand's premium image and commitment to quality. This web application enhances customer convenience and drives business growth through its optimized functionality and design.

Coffee Shop Ui/Ux Design

Coffee Break

Designed an intuitive and user-friendly mobile application for a coffee shop, tailored to provide a seamless digital experience for coffee lovers. The app features a modern and visually appealing interface with responsive design, ensuring effortless navigation on all mobile devices. Users can browse the menu, customize their beverages, and place orders for pickup or delivery with ease. Key features include a streamlined checkout process, loyalty

rewards integration, personalized recommendations, and real-time order tracking. The design reflects the warmth and energy of the coffee shop brand, delivering a delightful and engaging experience that enhances customer satisfaction and boosts loyalty.

Nike Shop Ui/Ux Design

Nike

Designed an intuitive and user-friendly mobile application for a shoe shop, offering a seamless shopping experience for footwear enthusiasts. The app features a modern and visually appealing interface with responsive design, ensuring effortless navigation across all mobile devices. Users can browse an extensive catalog of shoes, filter options by size, style, and price, and view detailed product descriptions with ease. Key features include a streamlined checkout process, personalized product recommendations, loyalty rewards integration, and order tracking. The design reflects the shoe shop's trendy and stylish brand identity, providing an engaging and satisfying user experience that boosts customer loyalty and sales.

E-Commerce Website

GimmyLK

Developed a dynamic e-commerce platform for GimmyLK, a stylish clothing store. The website combines a sleek and responsive UI, leveraging JavaScript, HTML, and CSS for the frontend. For the backend, PHP handles server-side logic, while MySQL ensures secure and efficient database management.
